THE NEED FOR CO-ORDINATED RESEARCH

J. C. BEENHAKKER B.Sc. (Physiotherapy) (Witwatersrand) D.P.E. (Witwatersrand)*

Research in all fields of physiotherapy, which is long overdue, can only result in improved patient care. We must be sure that our treatment programmes do have the effects that we are hoping to achieve, which will only occur when these effects are investigated and the results of the findings analysed.

Too long have modalities been used 'because they work'! If we do not know why they work, how can we be sure that something else will not be more successful? I often have the feeling that our patients improve in spite of physiotherapy!

Evaluation of the delivery of health services to the patient as well as the community is required. Are we making the best use of available resources? We need to investigate the effects of our various modalities on normal tissue and endeavour to determine whether these effects are altered by injury or disease. We will have to design and construct measuring devices which will give an objective method of assessing a patient's response to treatment, and research into the most effective and reliable tool is required.

Research is the natural result of attempting to find answers to questions. Every physiotherapist must have come up against some problem in her work, yet very few have set out to solve this on a scientific basis. Each one of us is in a position to test a theory, whether this is in the clinical field or of a more academic nature, yet how often is this done?

If research is being done, why do not more physio­therapists know about it? It would seem that there is a pressing need for co-ordination of research projects both at an undergraduate and a postgraduate level.

Physiotherapists who are involved in research projects or clinical trials, or those who would like to become involved, have very little idea of what is being done in South Africa. Even the worthwhile trials and surveys which have been written up, often lie forgotten in cupboards or on library shelves.

In order, therefore, to promote interest in research, a group was formed by the Physiotherapy Department at the University of the Witwatersrand. The aims of this group are to discuss problems in, and methods of research, to co-ordinate research efforts, to provide a platform to disseminate knowledge and provide a stimulus for further research.

This group of academic staff and practising clinicians meets every two months. Topics discussed have covered a wide field, including problems encountered by various workers and how these were resolved, the availability of research facilities, organisation of material and the method of writing up a dissertation. A tape on "Research in Cerebral Palsy" stressed the importance of the involvement of the clinician in the design of the experiment and the study of its clinical effectiveness.

Workshops are planned for 1979 and speakers will be invited to lead discussions in specialised areas. The results of trials and experiments undertaken by undergraduate students will be correlated in order to establish areas for further research.

It is felt that a group, such as this, could offer a co-ordinating service for research. Although the group is confined to the Johannesburg area, its activities could be expanded to a national level, if there was a sufficient need.

If any physiotherapist is interested in joining this group, they should contact the writer at the Physiotherapy Department of the University of the Witwatersrand.

* Acting Head, Department of Physiotherapy, University of Witwatersrand.
1. Rheumatic pains in joints and muscles
2. Fibrositis
3. Muscle cramps and stiffness
4. Other local pains and aches

pain is our scene...

**analgen ointment**

**Formulation:** Two pain-killing ingredients, diethylamine salicylate and nopoxamine, in a special ointment base to speed subcutaneous penetration.

**Indications:** Rheumatic pains in joints and muscles, low backache, fibrositis, sprains and bruises, muscular cramps and stiffness, neuralgic pains.

**Action:** Soothing, deep-penetrating, rapid pain relief with local anaesthetic effect.

**Application:** Massage gently into the skin around the affected area until completely absorbed. Apply as often as required.
NEWS FROM SPECIAL INTEREST GROUPS

Lecturers Group of S.A.S.P.:
Secretary: Miss S. Irwin-Carruthers,
Physiotherapy Department,
P.O. Box 63,
Tygerberg,
7505.

Manipulative Therapists Group of S.A.S.P.:
Secretary: Mrs. C. Edwards,
Erin Villa,
5 Lower Trill Road,
Observatory,
7925.

National Hospital Group of S.A.S.P.:
Secretary: Miss P. Bowerbank,
605 Tivoli Flats,
9th Avenue,
Wonderboom South,
Pretoria.
0084.

Obstetric Association of S.A.S.P.:
Secretary: Mrs. H. B. Kastell,
26 Desborough Ave.,
Winston Ridge,
Johannesburg,
2196.
Tel.: 40-4557.

Private Practitioners’ Association of S.A.S.P.:
Secretary: Miss B. Winter,
936 Libertas Medical Centre,
Goodwood,
7460.

S.A. Neurodevelopmental Therapy Association:
Secretary: Mrs. M. van der Spuy,
c/o Vista Nova School for Cerebral Palsied
Children,
Milner Road,
7700 Rondebosch.

THE OBSTETRIC ASSOCIATION

“Baby Spectacular ’78” was arranged by The Leo
Club of Highpoint, Johannesburg. To explain who they
are, here is the President’s message:—

“Leo’s is a Project of Lions International. The Lions
through their Youth Programme have enabled us at
Leo’s to promote service activities among the youth of the
community which develop the individual qualities of
Leadership, Experience and Opportunity.

The object of the Leo Programme is to provide the
youth of the world an opportunity for development
and contribution individually and collectively as re­
sponsible members of the local national and inter­
national community.

The motto of the Lions and Leo’s Organisation is
“We Serve”. It is through service, I believe, that
will have attained these goals.”

Several para-medicals, including the Obstetric Asso­
ciation of the S.A.S.P., concerned with babies and the
-growing child, were asked to exhibit at the Show held
at Milner Park Show Grounds, Johannesburg on
Saturday November 25.

Several posters were displayed on ante-natal and
post-natal physiotherapy, such as “Backache” “Fitness
during pregnancy” and “Getting back to normal”.
Motherhood booklets and bibs, which were kindly
donated by Lederle Laboratories, and pamphlets on
“What is Obstetric Physiotherapy?” were distributed.

The response of the public to “Baby Spectacular” was
tremendous, particularly in the entries for the baby
show competitions where literally thousands of babies
flocked!

Mrs. Mathias and Mrs. Goodman were two of the
exhausted members of a dedicated team of judges,
who attempted to judge the babies on their neuro­
development as well as their beauty. This project
was so successful that the organisers have decided to
make it an annual event.

Best wishes.

Elsa Smith (Chairman)
Pat Bowerbank (Secretary)
PRIVATE PRACTITIONERS ASSOCIATION

W.C.A.

Many private practitioners are dissatisfied with the rule requiring prior permission for treatments in excess of twenty. The problems arise when the medical advisor to the Commissioner disagrees with the patient's doctor whether more treatment is required. The Executive Committee has written to the Medical Association with permission of N.E.C. to try and enlist their help, as the problem affects their patients and their recommendations. Please contact the secretary if you have any problems with this, giving all the details of the case, so that we may substantiate our complaint.

Committee News

The Chairman of the Eastern Province Branch (Port Elizabeth) will be Mrs. L. Erasmus from the 15th January, 1979. She replaces Mr. E. van Wyk on the Executive Committee. The Committee requires an advertising manager for the directory. Please contact Mrs. Pilkington at (021) 69-5537 if you can help. You need not live in Cape Town. At the time of going to press the A.G.M. will have been held. A report will be submitted for the next issue of the journal.

WANTED

Machines and equipment for new private practice. Phone Johannesburg 40-4023, mornings only.

FOR SALE

Well established practice in Johannesburg area for sale. For details write to P.O. Box 78241 Sandton.
